

# Personalized Lesson

## How it works:

### Grade 2 to Grade 5:

My focus during these formative years is on building a solid foundation, particularly in preparation for Year 3 and Year 5 NAPLAN. I emphasize developing students' mathematical reasoning and awareness, while also familiarizing them with the Victorian NAPLAN system. To support their growth, I will create personalized test papers that align with their learning needs and help them excel.

### Grade 6:

Grade 6 marks a significant transition from earlier studies. As students approach Grade 7, they face new and exciting challenges, such as the introduction of algebra in Mathematics and different essay types in English. My goal is to guide them through this pivotal stage, ensuring they are well-prepared for the academic demands ahead.

### Grade 7 to Grade 9:

At this stage, my focus shifts to preparing for a variety of key assessments, including NAPLAN, AEAS, ACER, and Edutest. I will help students understand the nuances of each exam and assist them in identifying the path that best suits their aspirations, ensuring they are well-equipped to succeed.

### Pre-VCE and VCE:

For Pre-VCE and VCE students, I concentrate on enhancing their efficiency and proficiency in Chemistry, Mathematical Methods (MM), Specialist Mathematics (SM), and English. My primary responsibilities include crafting comprehensive lesson plans, developing Key Assessment Tasks (KAT), and providing targeted academic support. Through personalized guidance, I aim to equip students with the techniques and confidence needed to excel in their VCE studies.
